Richie Phinardi Kosasih

Career Objective

I am pursuing a Master of Information Technology at Kaplan Business School, supported by a Bachelor's degree in Business Management. I am looking for an opportunity in project coordination, business analysis, or data-focused work where I can build practical skills and contribute to meaningful outcomes. With prior experience in management and operations, I bring adaptability, clear communication, and a strong work ethic to support team success. I am looking forward to honing my skills and contributing to a team within the local industry market.

Technical Knowledge

- **Project Management Tools:** Trello, Jira, Gantt Chart (basic use from coursework and personal projects).
- **Business Analysis**: Requirement gathering, process mapping, documentation (from academic case studies).
- **Data Analysis:** SQL (basic select queries), Microsoft Excel (formulas, pivot tables).
- **Development**: HTML, CSS (including Tailwind), JavaScript (basic), React (basic; own portfolio and small projects with AI-assisted tools).
- **Collaboration & Productivity:** Microsoft Office Suite (Word, Excel, PowerPoint), Canva, Google Workspace.

Education

Master of Information Technology (Extension) **July 2024 – June 2026**
Kaplan Business School, Melbourne, Australia
Achievements*: High Distinction -- Database Design & Management, Website Development*
Distinction -- Information Systems in Business, IT Project Management, Service & Operations Management in IT, Introduction to Cyber Security

Bachelor of Management and Business **August 2013 - January 2017**
Ciputra University, Surabaya, Indonesia
Achievements*: High Distinction -- Management Information System, International Corporate Strategy*
Distinction -- Strategic Management, Risk Management

Academic Projects

Website Development Project **2025**
Kaplan Business School, Melbourne, Australia
Objective: To develop a travel guide website as part of the Website Development course, later expanded into a personal portfolio project.
Tools: HTML and CSS for site building, React, Tailwind CSS, and JavaScript to create a responsive and clean design adaptable for both desktop and mobile.
Duties: Managed the full development including layout design, debugging, styling, and code consistency.
Result: The project was fully functional at launch
Outcome: Received a High Distinction and was highlighted by the lecturer for its potential to be further developed.

Pekan Raya Universitas Ciputra Festival **2013**
Ciputra University, Surabaya, Indonesia
Objective: To be the Operational coordinator for a 4-day university festival with 100+ SME booths and thousands of visitors.
Duties: Oversaw booth operations, ticketing, vendor support, and logistics, while coordinating a team of over 150 students.
Tools: Google Workspace (Docs, Sheets, and shared, Calendar) for planning, budgets, and communicating effectively across teams.
Result: Helped secure major sponsors (Gen FM Radio, Sosro) and ensured smooth coordination with vendors and sponsors.
Outcome: The event sold out, gained media coverage, and received positive feedback from university and sponsors.

Employment History

ICT Team Intern
Rodd & Gunn, Melbourne, Australia **October 2025 – January 2026**

- Provided first-level IT support for global store and office users, troubleshooting hardware, software, and network issues.
- Assisted with ticket management, escalating complex incidents and maintaining accurate service records.
- Supported configuration and monitoring of network devices using Cisco Meraki and Microsoft Azure.
- Helped enforce cybersecurity controls including email protection (Mimecast), endpoint patching, and MFA setup through Microsoft Entra ID.
- Collaborated with IT and operations teams to test and deploy new systems, ensuring smooth business operations.

Operations In-charge **June 2023 – July 2025**
Ondeck Resources, Melbourne, Australia

- Managed daily distribution operations for around 40 drivers covering the western Melbourne area from Port Melbourne to Box Hill and Murumbeena.
- Mastered company software (iDriver) and delivery app (Circuit) to allocate drivers, track deliveries, and optimise routes
- Monitored key performance indicators including on-time delivery and missed newspaper counts.
- Handled operational issues such as late drivers, vehicle breakdowns, or incorrect bulk drops, ensuring service continuity.
- Communicated with drivers via WhatsApp and face-to-face briefings to resolve problems quickly and maintain workflow.
- Investigated and resolved emergency issues such as missing or stolen newspapers by reconciling warehouse stock and liaising with the central warehouse.
- Overall, minimized delivery delays through consistent driver communication and rapid problem-solving, maintaining customer satisfaction despite operational challenges.

Manager **November 2019 – May 2023**
PT Cahaya Teratai Abadi, Surabaya, Indonesia

- Oversaw daily operations for a chemical manufacturing and distribution company (SME) with 13 staff, covering production, logistics, sales, marketing, and supplier management.
- Managed stock levels and production schedules to balance customer demand, cash flow, and raw material availability.
- Using Accurate software for inventory control, sales and purchase recording, tax reporting, and generating financial statements.
- Prepared contracts and agreements with suppliers and customers using Word and Excel and tracking payment due dates with Google Calendar.
- Monitored production quality in coordination with laboratory staff to meet customer-specific requirements.
- Handled supplier relationships by negotiating prices, securing priority allocations during shortages, and maintaining favourable long-term agreements.
- Coordinated daily logistics and deliveries to ensure customer orders were fulfilled accurately and on time.
- Overall, reduced costs and delivery delays by optimising stock planning, maintaining consistent product quality, and strengthening supplier and customer relationships that secured reliable access to raw materials.

Personal Attributes

- **Strong organizational skills**, as demonstrated by managing daily warehouse operations with 40 drivers across Melbourne, ensuring on-time deliveries and handling unexpected issues effectively.
- **Problem-solving ability,** shown through negotiating with multiple chemical suppliers in Indonesia to secure stable raw material supply despite fluctuating prices and currency rates.
- **Adaptability and resilience,** proven by balancing postgraduate IT studies in Australia while working night shifts, maintaining performance in both academic and professional commitments.
- **Team communication**, developed through coordinating over 150 students and 100+ vendors during a 4-day university festival, ensuring smooth operations and successful outcomes.
