Career Objective

Master of Information Technology student with a background in business operations, ICT support, and practical React-based projects. Skilled in business process improvement, requirement documentation, troubleshooting, JavaScript, React, Microsoft Azure, Cisco Meraki, and Microsoft Entra ID. Seeking an entry-level Business Analyst, Junior Web Developer, Business Systems, or IT role where I can combine technical learning, operational experience, and problem-solving skills.

Technical Knowledge

- **Business Analysis & Systems:** Requirement gathering, process mapping, documentation, business process improvement
- **Cloud & Admin Tools:** Microsoft Azure, Microsoft Entra ID, Cisco Meraki, Mimecast
- **Web Development:** HTML, CSS, Tailwind CSS, JavaScript, React, Vite
- **Data & Productivity:** SQL basics, Excel formulas, Pivot Tables, Google Workspace, Microsoft Office
- **IT Support:** Hardware/software troubleshooting, ticket management, user support, incident escalation
- **Project & BA:** Jira, Trello

Education

Master of Information Technology (Extension) **July 2024 – June 2026**
Kaplan Business School, Melbourne, Australia

Achievements*: High Distinction -- Database Design & Management, Website Development*
Distinction -- Information Systems in Business, IT Project Management, Service & Operations Management in IT, Introduction to Cyber Security

Bachelor of Management and Business **August 2013 - January 2017**
Ciputra University, Surabaya, Indonesia

Achievements*: High Distinction -- Management Information System, International Corporate Strategy*
Distinction -- Strategic Management, Risk Management

Technical Projects

Business Dashboard — React, Vite, Tailwind CSS, JavaScript
GitHub: https://github.com/richiekosasih/yummom-dashboard

- Built a business management dashboard for a small frozen food business to manage products, inventory, orders, expenses, and daily summaries.
- Implemented product and batch tracking, expiry dates, stock alerts, order status, payment status, and expense categorisation.
- Used localStorage for client-side data persistence and structured the app with feature-based folders for scalability.
- Improved practical understanding of CRUD operations, state management, business logic, and front-end application structure.

Personal Portfolio Website — React, Vite, Tailwind CSS
GitHub: https://github.com/richiekosasih/richiedev
Live Demo: richiekosasih.com

- Built and deployed a responsive personal portfolio website to showcase technical projects and career profile.
- Used React components, routing, responsive layout, dark mode, animations, accessibility improvements, and SEO-ready structure.

Published source code on GitHub and prepared the project as a recruiter-facing portfolio.

Pekan Raya Universitas Ciputra Festival
Ciputra University, Surabaya, Indonesia
• Coordinated operations for a 4-day university festival with 100+ SME booths and thousands of visitors.
• Managed booth operations, ticketing, vendor support, logistics, and communication across a team of 150+ students.
• Used Google Workspace to support planning, budgeting, scheduling, and cross-team coordination.
• Helped ensure smooth event execution, sponsor coordination, and positive feedback from stakeholders.

Employment History

ICT Support Intern
Rodd & Gunn, Melbourne, Australia **October 2025 – January 2026**

- Provided first-level IT support for global store and office users, troubleshooting hardware, software, and network issues.
- Assisted with ticket management, escalating complex incidents and maintaining accurate service records.
- Supported configuration and monitoring of network devices using Cisco Meraki and Microsoft Azure.
- Helped enforce cybersecurity controls including email protection (Mimecast), endpoint patching, and MFA setup through Microsoft Entra ID.
- Collaborated with IT and operations teams to test and deploy new systems, ensuring smooth business operations.

Operations In-charge **June 2023 – July 2025**
Ondeck Resources, Melbourne, Australia

- Managed daily distribution operations for around 40 drivers across western Melbourne, coordinating routes, delivery performance, and issue resolution.
- Used iDriver and Circuit to allocate drivers, track deliveries, optimise routes, and monitor operational performance.
- Monitored KPIs including on-time delivery, missed newspaper counts, route completion, and driver performance.
- Resolved operational issues such as late drivers, vehicle breakdowns, incorrect bulk drops, and missing stock to maintain service continuity.
- Communicated with drivers and warehouse teams through WhatsApp and face-to-face briefings to support smooth daily operations.

Manager **November 2019 – May 2023**
PT Cahaya Teratai Abadi, Surabaya, Indonesia

- Oversaw daily operations for a chemical manufacturing and distribution SME with 13 staff across production, logistics, sales, marketing, and supplier coordination.
- Managed inventory, production schedules, supplier relationships, and customer orders to balance demand, cash flow, and raw material availability.
- Used Accurate software for inventory control, sales and purchase recording, tax reporting, and financial reporting.
- Prepared contracts, tracked payment due dates, coordinated deliveries, and supported quality control with laboratory staff.
- Improved operational efficiency by strengthening stock planning, supplier negotiation, product quality, and delivery coordination.

Personal Attributes

- **Strong organizational skills**, as demonstrated by managing daily warehouse operations with 40 drivers across Melbourne, ensuring on-time deliveries and handling unexpected issues effectively.
- **Problem-solving ability,** shown through negotiating with multiple chemical suppliers in Indonesia to secure stable raw material supply despite fluctuating prices and currency rates.
- **Adaptability and resilience,** proven by balancing postgraduate IT studies in Australia while working night shifts, maintaining performance in both academic and professional commitments.
- **Team communication**, developed through coordinating over 150 students and 100+ vendors during a 4-day university festival, ensuring smooth operations and successful outcomes.
